HVAC/Plumbing Engineer

Description

FIVES DTS is looking to hire a HVAC/Plumbing Engineer for opportunities with a construction engineering company in Toledo, OH.

Responsibilities

- Performs detailed phases of engineering work on major projects or total engineering work on projects of smaller or moderate scope
- Plans, develops, coordinates, and directs a medium to large engineering project or a number of smaller complex projects with overall responsibility for budget adherence, schedule adherence, quality control, and inter-discipline coordination
- Responsible for acceptance or rejection of submittals (which could include major items involving materials, equipment, manufacturer's quality, and field construction)
- Provides supervisor and project manager with scope of work change warnings
- May write portions or all of the specifications as needed
- Performs design work on REVIT
- Coordinates work with other disciplines
- Keeps current on new design methods and ideas
- Travel required

Qualifications

- Valid driver's license required (May be waived for international assignments)
- PE or PE-tracked preferred
- Five (5) or more years of related practical experience with former employer(s) required

Education

- Bachelor Degree in Mechanical Engineering, which qualifies for licensure in the state of practice, is required

Job Benefits

Hired employees will receive great benefits along with an extremely competitive compensation package. Benefits will include health, dental, life, and short-term & long-term disability. Other perks include vision insurance, a 401K with company match, paid time off for vacation and sick days, and more.
